Errata to the DAQ always runs

Håkan T. Johansson

April 15, 2009

page 13, Equation (1.7)

l should be λ.

page 31, last line

Change 2 to 3, even 4.

page 39, Equation (4.1f)

The minus signs in the numerators should be plus signs.

$$e_{i,j,\text{mean}} = \frac{\ln e_r + \ln e_l}{2} - \frac{\ln e_u + \ln e_d}{2}$$

page 39, Equation (4.2)

Should be moved 9 lines up, to follow "...one equation per crossing."

page 51, line 2

Change "the time" to "the time and location".

page 64, Section 6.2.2

Change "a 50-few 100 μs" to "50 to a few 100 μs".

page 94, Footnote 1

The footnote is in error, `flex` is not a `GNU` package.

page 101, 2nd paragraph, line 1

Change "Due to that, secondary isotopes with different A/Z and $B\rho$ and will have different times-of-flight..." to "Due to that, and that secondary isotopes with different A/Z and $B\rho$ have different times-of-flight...".
