Onsala, 2004-02-16

Dear Sirs,

Hereby we certify we have attended the course Astrophysical Dynamics given by Alessandro Romeo on LP2 2003.

Astrophysical Dynamics was, at first, a seemingly tough course for non professional physicists like us, however, every lecture was very well planned and all the complicated concepts were expressed in such an elegant manner that all we students enjoyed studying the subject.

The examination style was also really fantastic. Each one of us could do research into a specialized topic and at the same time have the opportunity to listen to each other and hence gain a lot of information from the examination. This I think is the best method of testing the student at the graduate level.

All in all the entire course-experience was a joyful one and I hope such courses would be offered more regularly and in many more subjects.

Thanks again to Alessandro for giving us the most inspiring lectures and for all the effort put in its preparation.
