

Students' Workshop
15-16 May

HOT TOPICS in Astrophysics 2001/2002

We students in Astrophysics invite you to a workshop of current astrophysical research. The talks are addressed to a wide audience of both students and scientists. Welcome!

Wednesday 15 May 13:15 - 17:15

- ♦ Organic Molecules in the Interstellar Medium
- ♦ What Do Comets Tell Us about the Young Solar System?
- ♦ The Search for Extra-Solar Planets
- ♦ Supernova Explosions
- ♦ Gravastars: Can Anything Be Stranger than a Black Hole?

Thursday 16 May 8:45 - 11:55

- ♦ Formation of Large-Scale Structure in the Universe
- ♦ Firestorm of Starbirth in the Early Universe
- ♦ Cosmological and Astrophysical N -Body Simulations
- ♦ Instabilities and Dynamical Evolution of Disc Galaxies

Location: Physics, F6306 in Forskarhuset, 6th floor

Supervisor: Alessandro Romeo
