There was an error in transcribing Fig. 1 into the variables  $\delta$  and  $D$ . These variables were not contained in the code used in the calculations, and our results were not affected. A corrected version of Fig. 1 is included with this erratum. We thank Jesper Kleis for discovering this error. The new figure also contains small corrections resulting from an improved integration method for evaluating Eq. (14), also suggested by Jesper Kleis.

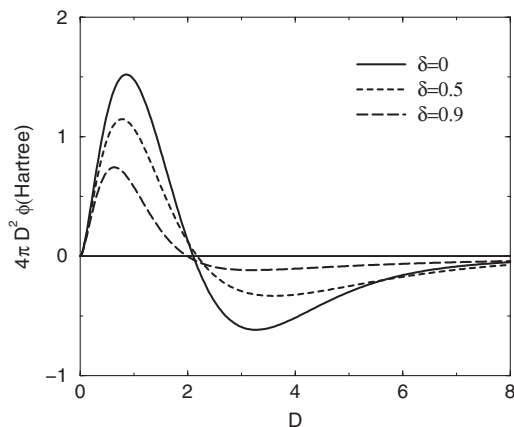

FIG. 1. This is the corrected version of Fig. 1. The original caption was correct.
